

Pawtucket's Brain In Play Foundation Officially Launches as a Charitable Organization

A Golf Tourney, followed by an event honoring top brain disease-injury care advocates, and which unveiled Brain In Play International's groundbreaking neurocognitive research results, marked Brain In Play Nonprofit Foundation's official launch. The event was held at Pawtucket Country Club Oct. 13, 2016 and was attended by nationally renowned physician and nurse scientists, pro-athletes, business owners, community leaders, foundation supporters, and patients and families facing neurological conditions. A statewide mayoral consortium on scientific brain wellness, in collaboration with Brain In Play Foundation, was announced.

Brain In Play Foundation's mission raises awareness about neurodegenerative diseases (Alzheimer's, Parkinson's, Psychiatric Syndromes, Substance Addiction and others) and concussions, and that a new evidence-based prevention and treatment clinical solution can help – Brain Performance EnhancementSM. BIP-Foundation also helps fund research projects, and facilitates treatment access for those suffering brain disease and concussion challenges at one of BIP-International's many clinical sites.

In closing, BIP-Foundation President Bill White and CEO Katharine White extend their deepest appreciation to all those who support our nonprofit's mission – fueling our passion to save the brains and improve the lives of everyone we are privileged to serve. We especially applaud our foundation sponsors, advisory board physicians, and all courageous patients/families struggling with brain diseases/injuries.
